

My family and I have been able to be harassed by unwanted calls from businesses. It is an invasion of our privacy that should not be allowed. Don't weaken Indiana's no call law. Also consider that the elderly are targets that are easily confused and taken advantage of during these calls. To me it is a criminal act the way they confuse people into "buying in" to what they are promoting. My 74 year old mother was constantly being suckered into signing up to phone services she didn't need, bank services she couldn't afford and so on. I am not talking about the scam artists, that is a whole other issue. It is the legitimate business calls.
